AT-KS-AK adapter grommets

based on KT large, for Keystone couplers, with protection cover / IP54

The grommet AT-KS-AK is constructed on the basis of a large KT cable grommet. The polyamide body is moulded with elastomer.

The cut-out enables a snap-in assembly of all couplers based on the Keystone system. If required the keystone couplers can be disassembled with a screwdriver.

The interface can be closed and even sealed using the protective cover on the front of the grommet.

The insertion of AT-KS-AK into an icotek cable entry frame enables the routing of cables with and without connectors in combination with the creation of interfaces for Keystone couplers within one cable entry system. Separate cut-outs for connectors are no longer necessary.

AT-KS-AK fulfills protection classes up to IP54 when the flap is closed (regardless of the keystone module type and manufacturer).
